MUHAMMAD USMAN

Security / Cloud / Infrastructure

Budapest, Hungary | usmanmighiana3898@gmail.com | linkedin.com/in/usman3898 | github.com/Mighiana
Available from March 2027

PROFILE

Final-semester BSc Computer Science and Engineering student at Óbuda University, graduating February 2027, with hands-on engineering work across cloud security, network security, PKI/identity, privacy engineering and security automation. Experience building and validating security-focused systems using AWS, Terraform, Python, C#, Windows Server, Docker and CI tooling.

EDUCATION

Óbuda University — John von Neumann Faculty of Informatics

BSc Computer Science and Engineering | Budapest, Hungary | Expected February 2027
Specialization: Cloud Service Technologies & IT Security | Stipendium Hungaricum Scholarship

BSc Thesis: *Automation of Red Team Security in Controlled Environments* — research / experimental-design stage. Investigating whether automated adversary-emulation results correspond with independently observed endpoint activity and defensive monitoring.

SELECTED ENGINEERING PROJECTS

BlastRadius — Terraform Security Impact Analysis

2026 · Private Beta | Python · FastAPI · React · TypeScript · Terraform · GitHub Actions
GitHub: https://github.com/Mighiana/BlastRadius

- Built a Terraform security-analysis tool that compares infrastructure changes and identifies newly introduced attack and reachability paths to sensitive AWS resources.
- Models supported cloud relationships as an infrastructure graph and produces explainable **SAFE TO MERGE**, **REVIEW REQUIRED** and **BLOCK CHANGE** decisions with supporting evidence.
- Supports JSON, Markdown and SARIF reports for command-line, CI and pull-request security review workflows.

Secure Cloud File Management Platform

Nov 2025 – Oct 2026 · Locally Verified | C# · ASP.NET Core 8 · SQL Server · Amazon S3 · Terraform · Docker · ClamAV
GitHub: https://github.com/Mighiana/Cloud-Based-Secure-File-Management-System

- Extended a university cloud project into a security-focused file platform where uploads remain quarantined until integrity, file-signature and optional ClamAV checks succeed.
- Implemented per-user authorization, SHA-256 verification, approved-only pre-signed downloads, least-privilege storage controls and tamper-evident audit logging.
- Validated locally using Docker/LocalStack with automated application, Lambda and infrastructure-security checks; deployment scope remains local/test rather than production AWS.

SecureVPC — AWS Network Security with Terraform

Aug 2025 – Oct 2026 · Terraform Reconstruction / Offline Validation | AWS · Terraform · EC2 · VPC · CloudWatch · TFLint · Checkov
GitHub: https://github.com/Mighiana/SecureVPC

- Reconstructed a manually deployed AWS networking lab as Terraform with a public bastion and a workload isolated in a private subnet with no public IP.
- Hardened the architecture using SG-to-SG access, custom NACLs, NAT-only egress, IMDSv2, encrypted storage and VPC Flow Logs.
- Added Terraform tests, TFLint, Checkov, ShellCheck and CI validation; the 2026 Terraform reconstruction is validated offline and has not been deployed.

Windows Enterprise PKI & Certificate Trust Lab

2026 · Lab Completed / Tooling Added | Windows Server 2022 · AD DS · AD CS · Group Policy · IIS · PowerShell
GitHub: https://github.com/Mighiana/Windows-enterprise-pk

- Built an Active Directory-integrated Enterprise Root CA and distributed root trust through Group Policy.
- Issued a SAN-based machine certificate, configured IIS HTTPS and verified the full trust chain.
- Later added read-only PowerShell PKI verification and AD CS configuration-audit tooling with Pester, PSScriptAnalyzer and CI.

SafePaste — Local Privacy Firewall for Technical Logs

2026 · Working / Local-Only Demo | JavaScript · Web Workers · Node.js · CSP · GitHub Actions
GitHub: https://github.com/Mighiana/SafePaste

- Built a local-only technical-log sanitizer for identifying sensitive data before logs are shared.
- Supports deterministic detection, human review, sanitization and privacy reporting without a backend, network egress, tracking or persistent log storage.
- Added structured parsers, privacy profiles, pseudonymization, red-team evaluation and automated privacy/security checks.

EXPERIENCE & LEADERSHIP

Volunteer Secretary — Erasmus Student Network (ESN) Óbuda

2025 – 2026 | Budapest, Hungary

- Coordinate communications, meeting documentation and operational follow-up for an international student organization.
- Support international-student onboarding, university communication and recurring event and administrative coordination.

Mentor — Stipendium Hungaricum Mentor Network

2025 – 2026 | Budapest, Hungary

- Mentor assigned international students through academic systems, university procedures, documentation and deadlines.
- Create reusable guidance for recurring onboarding and administrative questions and follow up individually when needed.

INTERNATIONAL & ACADEMIC PROGRAMS

Human-Centered Artificial Intelligence and Emerging Digital Technologies

University “Ukshin Hoti” Prizren, Kosovo | 5–14 Aug 2026 | 10-day summer school · 4 ECTS · Grade A

European Impact Sprint — HPI Engine / Hasso Plattner Institute

Potsdam, Germany | Aug 2026 | Four-day sprint with 60 computer-science students from 25 European universities

Cybersecurity & Compliance Engineering Bootcamp — Óbuda University × CC Lab

2026 | Participant · additional cybersecurity development alongside university studies

SELECTED TRAINING

DevOps with Docker — University of Helsinki. Docker, Docker Compose, networking, container security, optimization.

AWS Cloud Training — Amazon Web Services. Cloud Practitioner Essentials; Cloud Quest: Cloud Practitioner (Aug 2025). Training, not AWS certification.

TECHNICAL SKILLS

Used in projects: Python, C#, JavaScript, PowerShell, Bash, AWS, Terraform, Docker, Git/GitHub, GitHub Actions, S3, EC2, VPC, IAM, Windows Server, AD DS, AD CS, PKI/X.509, TLS, SQL Server, LocalStack, TFLint, Checkov, ShellCheck

Coursework / familiar: Linux/Ubuntu, routing, switching, VLANs, NAT, ACLs, DNS, CloudWatch, CloudTrail, REST APIs

Languages: English — Fluent · Urdu — Native · German — Basic · Hungarian — Basic
